

METALIM

THE INTELLIGENT METAL DETECTOR FOR THE FOOD INDUSTRY

METALIM TUNN-AL for conveyor belts

The TUNN-AL metal detector is designed to be installed on conveyor belts and lifting belts; alternatively is available the metal detector head alone for installation on pre-existing devices.

The metal detector can be manufactured in a monoblock configuration (electronic board and transducer joined in the same box) or in a separated groups configuration.

TUNN-AL METAL DETECTOR ON STAINLESS STEEL STRUCTURE FOR FISH PACKINGS INSPECTION

VERSIONS:

CO-EL's conveyors are manufactured with an anodized aluminium frame (suitable for dry environments) or stainless steel frame (suitable for high humidity environments); their structure is solid and compact, compliant in every part with the hygiene regulations for food industry. Both versions can be equipped with several accessories.

STANDARD EQUIPMENT:

- CUSTOMIZABLE CONVEYOR'S LENGTH AND WIDTH
- BELT STOP ON ALARM
- FOOD COMPLIANT POLYURETHANE BELT OR MODULAR BELT
- FIXED BELT SPEED
- HEIGHT ADJUSTABLE FEET

ACCESSORIES:

- EJECTION DEVICES (SEE BELOW SCHEMES)
- LIGHT AND ACOUSTIC ALARM
- SIDE GUIDES FOR PRODUCT
- PIVOTING AND BLOCKABLE WHEELS
- ADJUSTABLE BELT SPEED
- BN FOR SELECTED PRODUCTS

TUNN-AL dimensions

TUNN-AL OPENING (lower dimension between H ed L)	TUNN-AL head SERIES
LOWER THAN 100 mm	SERIES 200 (P = 200 mm)
BETWEEN 100 mm E 300 mm	SERIES 300 (P = 300 mm)
HIGHER THAN 300 mm	SERIES 400 (P = 400 mm)

POSSIBLE CONFIGURATIONS

EJECTION DEVICES:
